All Comments (Not Selected):

What your TA did best to help you learn the material?

- Helpful feedback in recitations.
- Madhulika was the most ideal TA I have ever had. She was always available, whether by email or in person. She was extremely helpful at teaching STATA command and not rude or condescending like the other IPEC TA. I really could not have completed my thesis without her. She has a great personality and I really think she is a great contribution to the Georgetown Economics Department. By far the best TA I have had at Georgetown. She knows everything about STATA and can convey this information in an friendly and easy manner. She really stepped up and covered for ███. People would have been so confused and mislead without her.
- Went through the steps with me and helped lead me in the right direction
- She was amazingly patient as she taught all of us how to use Stata while we were working on our theses. I can't thank her enough for all the help!
- She was so helpful throughout the semester and very responsive. Many of my questions required long conversations in order for me to understand them, and she was always patient and willing to work through problems with me.
- She gave actionable recommendations to help build original experiments, if you were prepared. She is very knowledgeable about econometrics and I felt she could help me with advanced topics.
- Thoughtful feedback and help with Stata
- madhulika khanna was the best TA - ███ was not a good professor, but madhulika khanna saved the class

- Clear and concise answers and suggestions
- Madhulika always had good advice and answers to questions, and if she didn't know she suggested other people to reach out to.

Define any criticism you have of your TA.

- Not really. She was very good especially considering the professor was not available to meet with students.
- I honestly could not tell you one thing my TA did wrong. She is the best TA I have had at my time at Georgetown
- Extremely smart, sometimes hard to follow the steps. Not her fault though, many smart professors have the same issue
- None--thank you so much for all your help this semester!!!
- None really. She made herself available and had good feedback. She could have given more detailed written feedback, but I understand she had a lot of students (and I believe had a heavier workload for advising students than the other TAs for this class).
- N/A
- Not a criticism of Madhulika herself, but I wish the IPEC Capstone had had more structured meetings with the TA's. We only had 3 official meeting times.

Specify suggestions that would help your TA improve his/her teaching skills.

- Not much, maybe try to use analogies to describe confusing topics. Not really relevant to this process though.
- Giving more constructive criticism about students' proposals and work would be helpful to let us know where we stood - sometimes it was hard to tell if we were doing well or not, given the lack of grading throughout the semester.
